Exemplary Performance

© GreenExamPrep.com. Not for Resale

Increase from 50% to 75%

The project may be awarded one innovation point for exemplary performance in restoring or protecting a minimum of 75% of the site area (excluding the building footprint) with native or adapted vegetation on previous developed or graded sites.

Exemplary Performance

Provide Documentation

Projects may be awarded one innovation point for exemplary performance in alternative transportation, SS Credit 4, by instituting a comprehensive transportation management plan that demonstrates a quantifiable reduction in personal automobile use through the implementation of multiple alternative options.

Exemplary Performance

© GreenExamPrep.com. Not for Resale

Increase from 50% to 100%

Projects may be awarded an innovation point for exemplary performance by demonstrating that either, 1) a minimum of 100% of non-roof impervious surfaces have been constructed with high-albedo materials and/or open grid paving and/or will be shaded within five years; OR 2) 100% of the on-site parking spaces have been located under cover.

Exemplary Performance

Option 1 – Increase from 25% to 50%
Option 2 – Increase from equal to the building footprint to double the building footprint
Option 3 – Increase from 20% to 40%

Projects may be awarded an innovation point for exemplary performance by demonstrating that they have doubled the amount of open space required for credit achievement. All designated open space shall be within the LEED project boundary. For example, projects with local zoning requirements must increase the amount of open space provided by 50%.

Exemplary Performance

Increase from 50% to 100%

Projects that demonstrate a 100% reduction in potable water use for sewage conveyance, OR, on-site treatment and re-use/infiltration of 100% of generated wastewater will be considered for one additional point under the Innovation in Design category.

Exemplary Performance

Increase from 75% to 100%

This credit may be eligible for exemplary performance under the Innovation & Design section if 100% of the project's roof area (excluding mechanical equipment, photovoltaic panels, and skylights) is comprised of a green roof system.
